SUMMARY

Aspiring Software Engineer skilled in Java, Python, and the MERN stack. Passionate about building scalable solutions and solving real-world problems. Quick learner and strong team player, eager to grow in fast-paced tech environments.

EDUCATION

B.Tech, Computer Science Engineering, CMR Institute of Technology - Hyderabad Expected May 2026
CGPA: 8.15/10

Intermediate (MPC), Narayana Junior College - Hyderabad May 2020 – April 2022
Percentage: 98.4%

PROJECTS

MetaConnect — ReactJS, ExpressJS, NodeJS, MongoDB, Socket.IO, WebRTC

Developed a real-time Metaverse-style web app simulating a virtual office, where users interact via avatars using live text, voice, and video. Integrated WebRTC and Socket.IO for low-latency media streaming and real-time signaling. Built a responsive React + Tailwind UI with persistent session handling via MongoDB. Also implemented avatar-based presence detection and private space logic. ([GitHub](#)) ([Live](#))

Library Management System — Java, MySQL, JDBC

Created a CLI-based application for managing library operations, including user registration, book lending, returns, and fine calculation. Implemented secure and efficient CRUD operations with JDBC and structured MySQL schema design. Added modular features like role-based access (librarian/staff) and search/reporting functionality to streamline tasks. ([GitHub](#))

Pneumo.AI — ReactJS, Flask, TensorFlow, Python

Built an AI-powered diagnostic platform using a CNN model to detect pneumonia from chest X-rays (83% accuracy, 90% recall). Designed a Flask backend serving ML predictions via REST APIs and integrated it with a React-based frontend. Demonstrated end-to-end AI deployment including data preprocessing, model training, and result visualization for real-world healthcare use. ([GitHub](#))

SKILLS

Languages	C/C++, Java, Python, JavaScript, HTML, CSS
Web Technologies	ReactJS, ExpressJS, NodeJS, Tailwind CSS, Bootstrap
Databases	MySQL, MongoDB
Developer Tools	Git, GitHub, VS Code, Google Colab
Other Skills	GenAI, Prompt Engineering, Problem-Solving, RESTful APIs, OOP, Agile (Familiar)

ROLES & RESPONSIBILITIES

Co-founder & Vice President, Robotics Club, CMRIT

Lead innovative robotics projects in an agile environment, mentored peers, and improved technical skills, fostering collaboration and participation.

ACHIEVEMENTS

Collaborated with a two-member team to advance to the Basha Bandu Hackathon Regionals by Microsoft. Secured first prize in Robo Sumo at BITS Pilani, Hyderabad. Competed in multiple hackathons, demonstrating strong problem-solving and teamwork skills.
